

# Corteva Agriscience™

Corteva Agriscience™, Agriculture Division of DowDuPont, is a leading, U.S.-based, pure-play agriculture company with global presence.

We provide farmers with the right mix of seeds, crop protection and digital solutions to maximize their yields and improve their profitability, while strengthening customer relationships and ensuring an abundant food supply for a growing global population.

**Goal:** Deliver complete solutions, expanded choices and greater value, with an enhanced R&D engine to drive future growth.

## US Footprint, broad offerings, advantaged route to market

## Key Policy Concerns:

### Crop Protection Market Access and Review Processes

The crop protection development and approval process is one of the most stringent in the world. Corteva Agriscience™ firmly believe that the security of our value chain depends on innovative solutions, including farmer access to crop protection. We are invested in the continual development of products that are safe, support sustainability, and help farmers combat climate change.

### Seed Biotechnology Innovations and Gene Editing Market Access

Today's farmers are being asked to produce higher yields with fewer resources, all while facing harsher climate conditions. These stressors, combined with global trends such as rapid population growth and increased demand for nutritious foods, mean farmers need innovative agricultural tools to respond. Corteva Agriscience™ is committed to innovating solutions that will create value for society and ensure sustainability.

### Trade

As a global company, international trade and investment rules provide predictability for our business, not only by opening markets for our U.S. products, services and technologies, but also through the promotion of rules that defend intellectual property rights and the implementation of dependable science-based regulatory systems. US agriculture is one of the most dynamic, globally competitive sectors and can benefit from trade agreements.

### Farm Safety-Net, Market Stabilization and Credit

America's farmers and ranchers' ability to withstand the uncertainties of weather and markets through the delivery of commodity support, crop insurance, conservation, and credit programs helps to improve the stability and strength of the domestic agricultural economy.

### Key Policy Priorities:

- PRIA Reauthorization
- A functioning ESA/FIFRA Consultation Process

### Key Policy Priorities:

- Coordinated Framework of Biotechnology Regulations between the USDA/EPA/FDA
  - Update APHIS Part 340
  - Update FDA 1992 policy
  - Update EPA PIP policy
- Marketing and Labeling of Food Products Containing Bioengineered Ingredients

### Key Trade Areas:

- USMCA
- China
- EU/ Japan

### Key Policy Priorities:

- Farm Bill Implementation
- Renewable Fuel Standard
