

REMINGTON RESEARCH GROUP

ALASKA

STATEWIDE

June 2018

Survey conducted June 18 through June 19, 2018. 1,004 registered voters participated in the survey.

Margin of Error is +/-3% with a 95% level of confidence. Totals do not always equal 100% due to rounding.

REMINGTON RESEARCH GROUP

Q1: On the National Park Service's National Preserves in Alaska, such as Denali, a 2015 rule prohibited hunters and trappers from killing wolves and coyotes at den sites. Do you support or oppose a proposal to again allow hunters and trappers to kill whole wolf- and coyote-family members, including their pups, at their den sites on national preserves in Alaska?

Support: 34%

Oppose: 57%

Not sure: 9%

Q2: On the National Park Service's National Preserves in Alaska, such as Glacier Bay, a 2015 rule prohibited hunters from killing sleeping black bears (including mothers with dependent cubs) in the den with the aid of artificial lights such as flashlights. Do you support or oppose a proposal to again allow the killing of hibernating black bear mothers and their cubs with the aid of artificial lights on national preserves in Alaska?

Support: 22%

Oppose: 71%

Not sure: 7%

Q3: On the National Park Service's National Preserves in Alaska such as Katmai, a 2015 rule prohibited hunters and trappers from baiting brown and black bears. Hunters and trappers bait bears with pet food, grease, rotting game or fish and other high calorie foods. Baiting bears accustoms them to a certain location making it easier for a hunter to shoot them. Do you support or oppose a new proposal to again allow hunters to bait brown and black bears on national preserves in Alaska?

Support: 34%

Oppose: 60%

Not sure: 6%

Q4: On the National Park Service's National Preserves in Alaska, such as Gates of the Arctic, a 2015 rule prohibited guides from using packs of hounds to chase and corner black bears in trees so that hunters could more readily shoot them. Do you support or oppose a new proposal to again allow guides paid by hunters to hunt bears with hounds on national preserves in Alaska?

Support: 26%

Oppose: 69%

Not sure: 5%

REMINGTON RESEARCH GROUP

Q5: On the National Park Service's National Preserves in Alaska, a 2015 rule prohibited "predator control" – that is, the controversial practice of killing predators such as bears and wolves to increase moose, caribou and Dall's sheep numbers for hunters. Do you support or oppose a new proposal to again allow predator control to occur on national preserves in Alaska?

Support: 50%

Oppose: 43%

Not sure: 7%

Q6: On National Park Service's National Preserves in Alaska, a 2015 rule prohibited the killing of swimming caribou including with motor-powered boats. Do you support or oppose a new proposal to again allow the killing of swimming caribou, including with motor-powered boats, on national preserves in Alaska?

Support: 22%

Oppose: 75%

Not sure: 3%

Q7: Each year, hunters and trappers target and kill wolves, brown bears, black bears, wolverine, lynx and other wildlife on state lands along the northeast boundary of Denali National Park & Preserve (also known as the Stampede Trail). This affects Denali's ecosystem and reduces the Park's 650,000 annual visitors' wildlife-viewing success. Do you support or oppose establishing a no-kill buffer zone on these state lands adjacent to the northeast boundary of Denali National Park and Preserve to protect wolves, bears, wolverines, lynx and other wildlife?

Support: 54%

Oppose: 37%

Not sure: 9%
