

Updates to the Allowance Allocation and Trading Program Under the American Innovation and Manufacturing Act for 2024 and Later Years

HFC Allowance Allocation and Trading Program for 2024 and Later Years

Agenda

- Introduction to Chemours
- AIM Act Background
- Acknowledgement of EPA
- Chemours recommendation for 2024 and Later Years Rulemaking
- Questions
- Wrap Up

OUR THANKS TO EPA

We commend and thank EPA for all their efforts to manage a tight timeline, create an effective 2022/2023 regulation to start the HFC program and their work on preparing for the next major HFC stepdown in 2024 and beyond.

Recommendations for the 2024 and beyond Rulemaking

1. Keep the 2022/2023 methodology for 2024 and later years
2. An auction scheme should not be used
3. Only producers and importers of record should get allowances
4. Critical to drive enforcement actions on illegal HFCs

Thank You!
