

## Alliance for Chemical Distribution

Chemicals and chemical products contribute to improvements in well-being, safety, comfort, and convenience in every facet of our daily lives. ACD's over 400 members have the deep expertise, commitment to safety and sustainability to deliver the essential chemical products our world depends on.

### THE CHEMICAL DISTRIBUTION INDUSTRY CONTRIBUTES:

#### U.S. ECONOMIC IMPACT

Companies engaging in chemical distribution have a total direct economic impact of more than

**\$27 billion.**

#### WELL-PAYING JOBS

The chemical distribution industry employs approximately 20,000 people directly and more than 75,000 people indirectly with an average wage of more than

**\$82,000.**

#### PRODUCTS TO EVERY INDUSTRY SECTOR

Chemical distribution companies formulate, blend, repackage, warehouse, transport, and market the chemical products produced by large-quantity manufacturers to **750,000** end users in nearly every industry sector, including:

- Aerospace and transportation
- Cosmetics, detergents, and fragrances
- Electronics, automotive, plastics, and steel
- Hospitals, research, and health care
- Paints and coatings, energy, and metal finishing
- Pharmaceuticals and food ingredients
- Water treatment, pulp, paper
- **AND MANY MORE**

#### TAXES

The chemical distribution industry generates more than **\$5 billion in state and local taxes and another \$5 billion in federal taxes** – money that helps fund the construction of schools, roadways, and other projects.

#### IN LOCAL COMMUNITIES

The chemical distribution industry operates in all 50 states through more than

**4,500 facilities.**
