Washington, DC, 20500

OMB Director Shalanda D. Young
New Executive Office Building
Washington, DC 20503

To President Joe Biden:

A decision to roll back the scale of a transition to electric vehicles would be a monumental failure of your administration and of industry to take action toward a fossil-free future. With climate change fast accelerating, this is no time to capitulate to corporate demands. There is still time for your administration to avoid this epic error and recommit to the science-backed actions you started.
