*Engineering News Record Texas & Louisiana* has named Mustang Energy Center as the best project winner in the energy/industrial category. The regional magazine annually holds a Best Projects competition for projects in Texas, Louisiana, Oklahoma, Arkansas and Mississippi. Out of a total of 121 entries, 42 projects across 18 categories were named as the region's best.

Mustang Energy Center was submitted to the competition by Burns & McDonnell who served as the engineering and construction manager on the project.

"Mustang Energy Center is a state-of-the-art facility that ushers in a new age of generation technology," said Sean Trauschke, OGE Energy Corp. Chairman, President and CEO. "Mustang also advances our commitment to regional reliability and resiliency. We appreciate the dedication of our partners and our members in executing this project on-time, under budget and incident- and injury-free."

The magazine will honor all winners at an awards ceremony in Houston on Oct. 18.
