Background

- **FDA public request for comments asked for feedback on**
 - **“Is the term ‘healthy’ most appropriately categorized as a claim based only on nutrient content?”**
 - **“What is consumer’s understanding of the meaning of the term “healthy” as it relates to food?”**
 - **“What are consumers’ expectations of foods that carry a “healthy” claim?”**
 - **“We are especially interested in any data or other information that evaluates whether or not consumers associate, confuse, or compare the term “healthy” with other descriptive terms and claims”**

Methods

- **A nationwide U.S. sample of 1,290 consumers was surveyed in December 2018**
- **Respondents answered 15 questions designed to gauge perceptions of healthy food and to elicit preference for policies surrounding healthy food definitions**
- **Responses are weighted to demographically match the population**
- **Categorical variables have a sampling error of $\pm 2.7\%$**

Which of the following affects whether or not you would consider a food healthy for you? (check up to 3 items that most apply)

Which of the following statements best matches your view?

Which of the following statements best matches your view?

	Single foods can be considered healthy or unhealthy	Only a whole diet can be considered healthy or unhealthy
Healthiness based on nutrients alone	<p>26.5% (Food-Nutrient Focus: health based on a food's nutrients)</p>	<p>25.6% (Diet-Nutrient Focus: health based on nutrients from whole diet)</p>
Healthiness based on more than nutrient content	<p>21.4% (Food-Nonnutritive Focus: health based on a food's entire composition)</p>	<p>26.5% (Diet-Nonnutritive Focus: health based on holistic consumption pattern)</p>

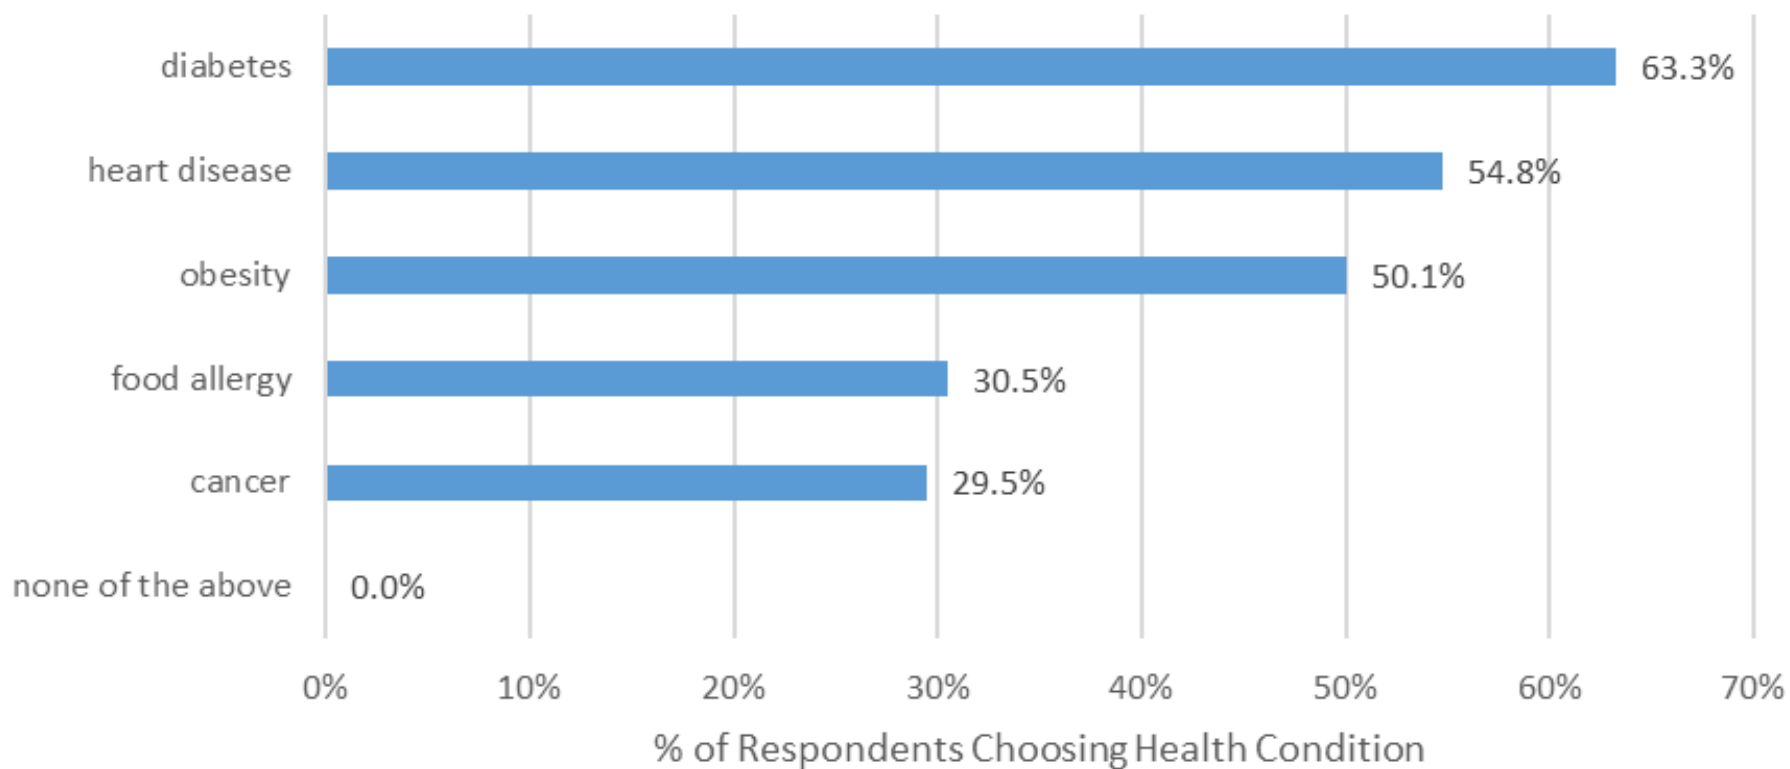

Do you consider each of the following foods to be healthy or unhealthy for you?

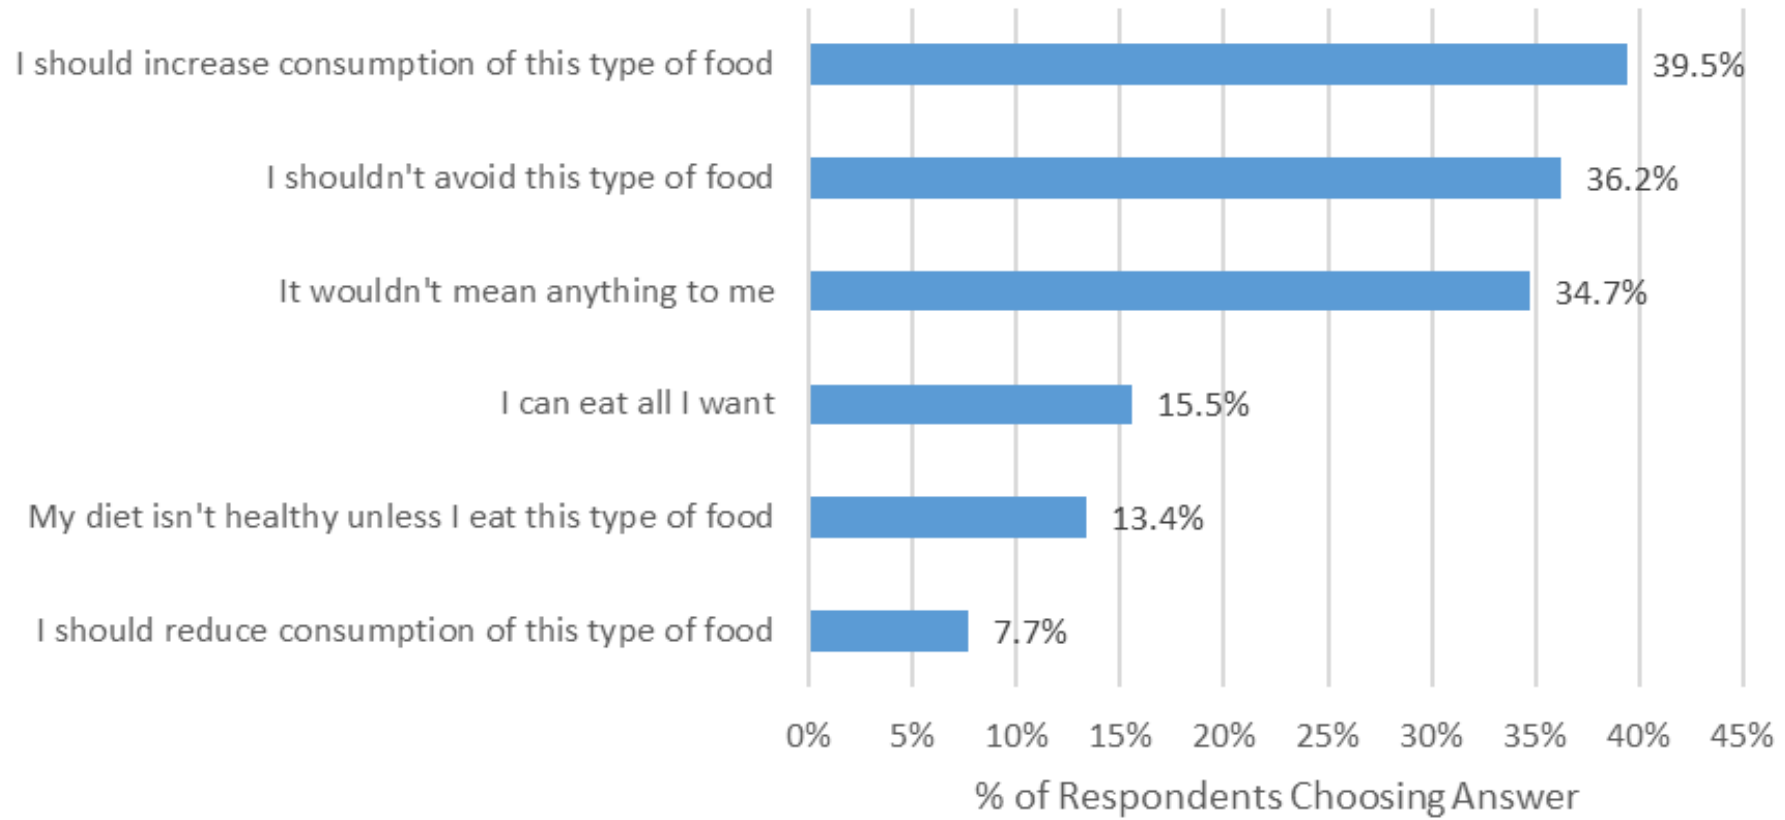

Dimensions of Food Healthiness

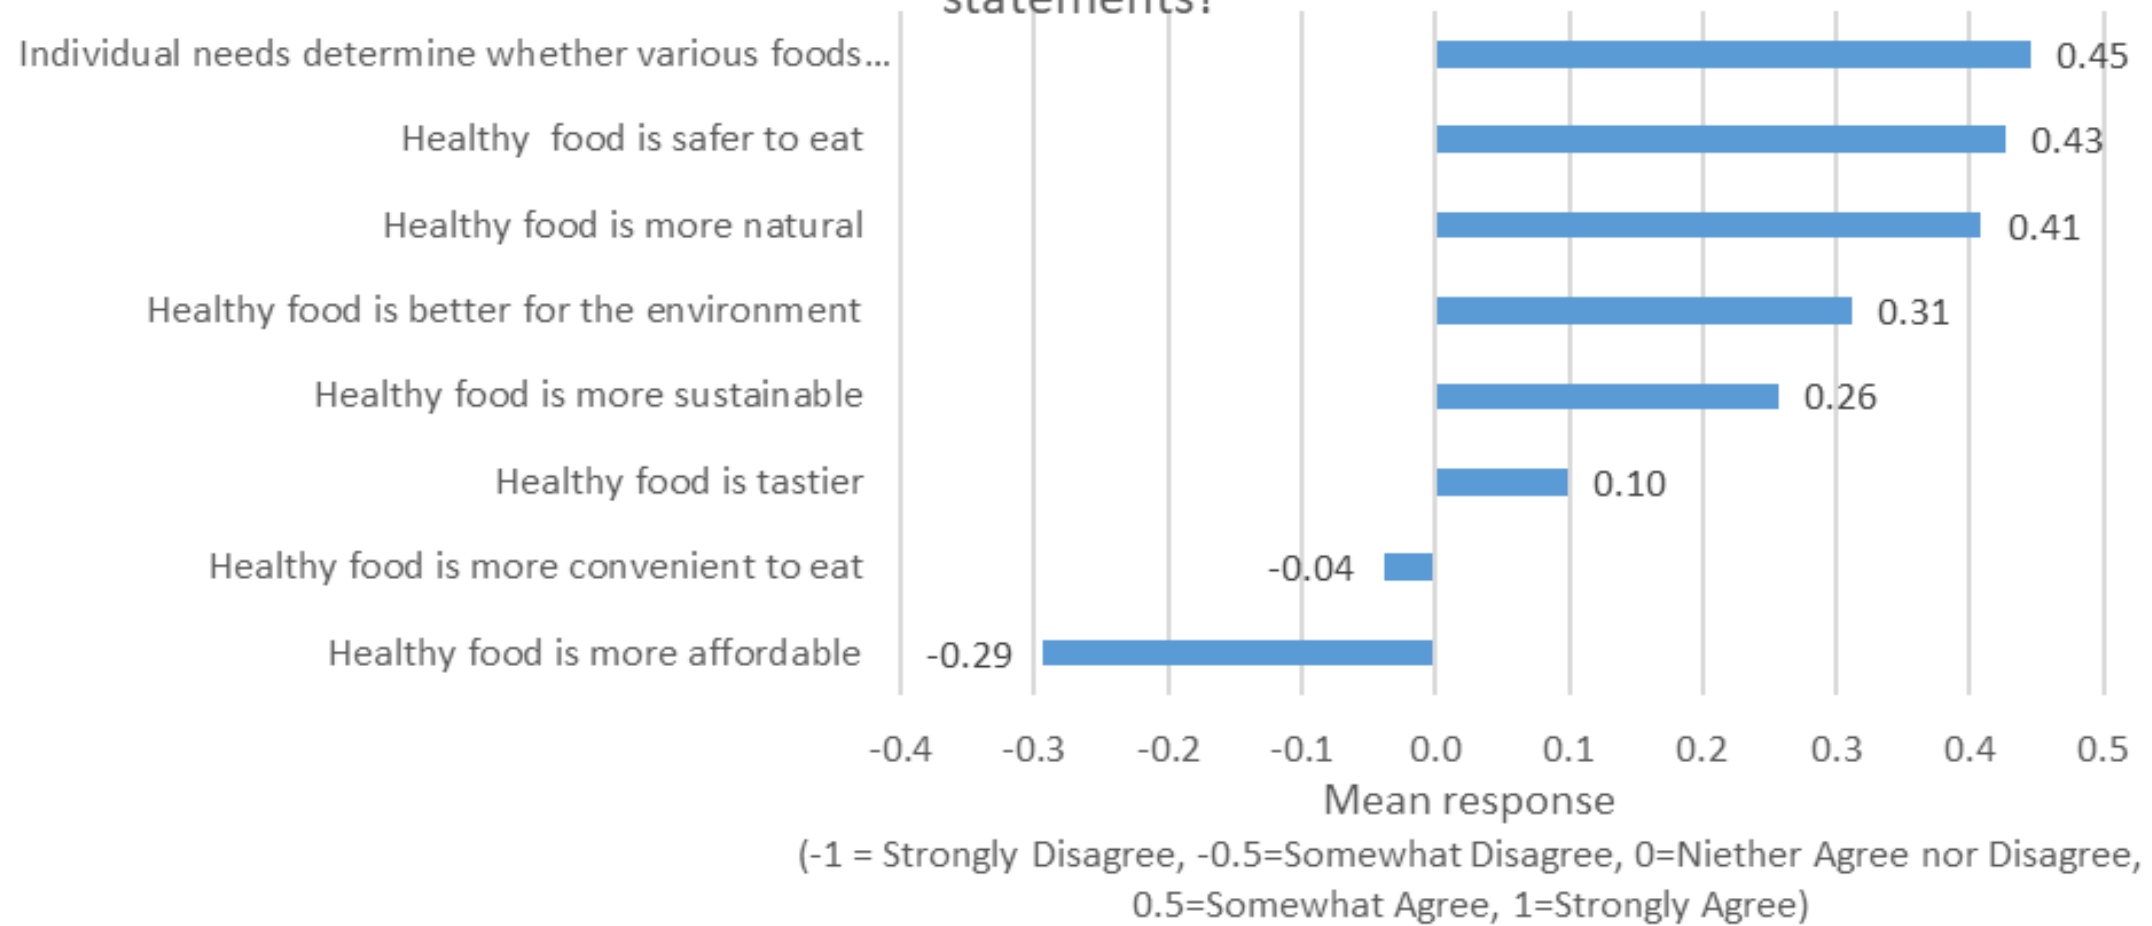

Which of the following diseases or health conditions do you think would affect which foods you consider to be healthy?
(check up to 3 items that most apply)

If a food is labeled "healthy", what would that mean to you?
(check up to 3 items that most apply)

To what extent do you agree or disagree with each of the following statements?

Wrap-up

- **Ratings of individual food products according to healthiness reveals that “healthy” is not a single unifying construct**
- **There was a high level of agreement with the belief that individual needs determine whether various foods are healthy for an individual**
 - **divide between whether food could be deemed healthy based solely on the foods’ nutritional content and whether healthiness is a characteristic of one’s overall diet or individual foods**
 - **further supported by responses indicating that various diseases and health conditions would affect most consumers’ perceptions of what was healthy for them**
