## INTRODUCTION

The information contained in this semiannual publication is updated to reflect any action that has occurred on rules since publication of the last NRC Agenda on July 23, 2013 (78 FR 44404). Within each group, the rules are ordered according to the Regulation Identifier Number (RIN).

The information in this Agenda has been updated through August 29, 2013. The date for the next scheduled action under the heading "Timetable" is the date the rule is scheduled to be published in the **Federal Register**. The date is considered tentative and is not binding on the Commission or its staff. The Agenda is intended to provide the public early notice and opportunity to participate in the NRC rulemaking

process. However, the NRC may consider or act on any rulemaking even though it is not included in the Agenda.

The NRC Agenda lists all open rulemaking actions. Three rules impact small entities.

### **COMMON PRIORITIZATION OF RULEMAKING**

The NRC has a process for developing rulemaking budget estimates and determining the relative priorities of rulemaking projects during budget formulation. This process produces a “Common Prioritization of Rulemaking” (CPR). The NRC adds new rules and evaluates rule priorities annually. The CPR process considers four factors and assigns a score to each factor. Those factors include 1) support for the NRC’s Strategic Plan goals; 2) support for the Strategic Plan organizational excellence objectives; 3) a governmental factor representing interest to the NRC, Congress, or other governmental bodies; and 4) an external factor representing interest to members of the public, non-governmental organizations, the nuclear industry, vendors, and suppliers.

The NRC’s fall Agenda contains its annual regulatory plan, which includes a statement of the major rules that the Commission expects to publish in the coming fiscal year (FY) and a description of the other significant regulatory priorities from the CPR that the Commission expects to work on during the coming FY and beyond.

### **SECTION 610 PERIODIC REVIEWS UNDER THE REGULATORY FLEXIBILITY ACT**

Section 610 of the Regulatory Flexibility Act (RFA) requires agencies to conduct a review within 10 years of promulgation of those regulations that have or will have a *significant* economic impact on a *substantial* number of small entities. The NRC undertakes these reviews to decide whether the rules should be unchanged, amended, or withdrawn. At this time, the NRC does not have any rules that have a *significant* economic impact on a *substantial* number of small entities; therefore, the NRC has not

included any RFA Section 610 periodic reviews in this edition of the Agenda. A complete listing of NRC regulations that impact small entities and related Small Entity Compliance Guides will be available from the NRC's website in the fall of 2013.

Dated at Rockville, Maryland, this 29<sup>th</sup> day of August 2013.

For the Nuclear Regulatory Commission.
