PENSION BENEFIT GUARANTY CORPORATION (PBGC)

Statement of Regulatory and Deregulatory Priorities

The Pension Benefit Guaranty Corporation (PBGC or Corporation) is a federal corporation created under title IV of the Employee Retirement Income Security Act of 1974 (ERISA) to guarantee the payment of pension benefits earned by over 33 million workers and retirees in private-sector defined benefit plans. PBGC administers two insurance programs — one for single-employer defined benefit pension plans and a second for multiemployer defined benefit pension plans.

- **Single-Employer Program.** Under the single-employer program, when a plan terminates with insufficient assets to cover all plan benefits (distress and involuntary terminations), PBGC pays plan benefits that are guaranteed under title IV. PBGC also pays nonguaranteed plan benefits to the extent funded by plan assets or recoveries from employers. In fiscal year (FY) 2021, PBGC paid over $6.4 billion in benefits to nearly 970,000 retirees. Operations under the single-employer program are financed by insurance premiums, investment income, assets from pension plans trustees by PBGC, and recoveries from the companies formerly responsible for the trusteeed plans.

- **Multiemployer Program.** The multiemployer program covers collectively bargained plans involving more than one unrelated employer. PBGC provides financial assistance (technically in the form of a loan, though almost never repaid) to the plan if the plan is insolvent and thus unable to pay benefits at the guaranteed level. The guarantee is structured differently from, and is generally significantly lower than, the single-employer guarantee. In FY 2021, PBGC paid $230 million in financial assistance to 109 multiemployer plans. Operations under the multiemployer program generally are financed by insurance premiums and investment income. In addition, the American Rescue Plan Act of 2021 (ARP) added section 4262 of ERISA, which requires PBGC to provide special financial assistance (SFA) to certain financially troubled multiemployer plans upon application for assistance, which is funded by general tax revenues.

While risks remain, the financial status of the single-employer program improved to a positive net financial position of $30.9 billion at the end of FY 2021. Due to enactment of ARP, the net financial position of the multiemployer program improved dramatically during FY 2021 from a negative net position of $63.7 billion at the end of FY 2020 to a positive net position of $481 million at the end of FY 2021. ARP
substantially improves the financial condition and the outlook for PBGC’s multiemployer program. By forestalling the near-term insolvency of the most troubled multiemployer plans, the multiemployer program is no longer expected to go insolvent in FY 2026 and can accumulate a greater level of reserve assets in its insurance fund in the near-term.

To carry out its statutory functions, PBGC issues regulations on such matters as how to pay premiums, when reports are due, what benefits are covered by the insurance program, how to terminate a plan, the liability for underfunding, and how withdrawal liability works for multiemployer plans. PBGC follows a regulatory approach that seeks to encourage the continuation and maintenance of securely-funded defined benefit plans. In developing new regulations and reviewing existing regulations, PBGC seeks to reduce burdens on plans, employers, and participants, and to ease and simplify employer compliance wherever possible. PBGC particularly strives to meet the needs of small businesses that sponsor defined benefit plans. In all such efforts, PBGC’s mission is to protect the retirement incomes of plan participants.

Regulatory/Deregulatory Objectives and Priorities

PBGC’s regulatory/deregulatory objectives and priorities are developed in the context of the Corporation’s statutory purposes, priorities, and strategic goals.

Pension plans and the statutory framework in which they are maintained and terminated are complex. Despite this complexity, PBGC is committed to issuing simple, understandable, flexible, and timely regulations to help affected parties. PBGC’s regulatory/deregulatory objectives and priorities are:

- To enhance the retirement security of workers and retirees;
- To implement regulatory actions that ease compliance burdens and achieve maximum net benefits while protecting retirement security; and
- To simplify existing regulations and reduce burden.

PBGC endeavors in all its regulatory and deregulatory actions to promote clarity and reduce burden with the goal that net cost impact on the public is zero or less overall.
American Rescue Plan

The American Rescue Plan Act of 2021 (ARP) added a new section 4262 of ERISA to create a program to enhance retirement security for more than 3 million Americans by providing special financial assistance (SFA) to certain financially troubled multiemployer plans. In turn, the SFA program improves the financial condition of PBGC’s multiemployer insurance program. For plans that adopted a benefit suspension under the Multiemployer Pension Reform Act of 2014 (MPRA), and for certain insolvent plans that suspended benefits upon insolvency, the SFA includes make-up payments of suspended benefits for participants and beneficiaries who are in pay status at the time SFA is paid, and prospective reinstatement of suspended benefits for all participants and beneficiaries.

Under new section 4262 of ERISA, PBGC was required within 120 days to prescribe in regulations or other guidance the requirements for SFA applications. To implement the program, on July 9, 2021, PBGC released an interim final rule adding a new part 4262 to its regulations, “Special Financial Assistance by PBGC,” which was published in the Federal Register on July 12, 2021. Part 4262 provides guidance to multiemployer pension plan sponsors on eligibility, determining the amount of SFA, content of an application for SFA, the process of applying, PBGC’s review of applications, and restrictions and conditions on plans that receive SFA. PBGC also released instructions and guidance on assumptions used for determining eligibility and the amount of SFA. PBGC held two webinars related to the interim final rule on the SFA application and review process; restrictions, conditions, and reporting; agency guidance; and program resources. The public comment period on the interim final rule ended on August 12, 2021, and PBGC expects to publish a final rule in January 2022.

Multiemployer Plans

In other multiemployer plan rulemakings, PBGC plans to publish a proposed rule prescribing actuarial assumptions which may be used by a multiemployer plan actuary in determining an employer’s withdrawal liability (RIN 1212-AB54). Section 4213(a) of ERISA permits PBGC to prescribe by regulation such assumptions.

PBGC also plans to propose a rulemaking that would add a new part 4022A to PBGC’s regulations to provide guidance on determining the monthly amount of multiemployer plan benefits guaranteed by
PBGC (“Multiemployer Plan Guaranteed Benefits,” RIN 1212-AB37). For example, the proposed rule would explain what multiemployer plan benefits are eligible for PBGC’s guarantee, how to determine credited service, how to determine a benefit’s accrual rate, and how to calculate the guaranteed monthly benefit amount.

Rethinking Existing Regulations

Most of PBGC’s regulatory/deregulatory actions are the result of its ongoing retrospective review to identify and correct unintended effects, inconsistencies, inaccuracies, and requirements made irrelevant over time. For example, PBGC’s regulatory review identified a need to improve PBGC’s recoupment of benefit overpayment rules (“Improvements to Rules on Recoupment of Benefit Overpayments,” RIN 1212-AB47). The “Benefit Payments” rulemaking (RIN 1212-AB27) would make clarifications and codify policies in PBGC’s benefit payments and valuation regulations involving payment of lump sums, changes to benefit form, partial benefit distributions, and valuation of plan assets. Other rulemakings would modernize PBGC’s regulations and policies by adopting up-to-date assumptions and methods that are more consistent with best practices within the pension community. For example, PBGC is considering modernizing the interest, mortality, and expense load assumptions used to determine the present value of benefits under the asset allocation regulation (for single-employer plans) and for determining mass withdrawal liability payments (for multiemployer plans) (RIN 1212-AA55).

Small Businesses

PBGC considers very seriously the impact of its regulations and policies on small entities. PBGC attempts to minimize administrative burdens on plans and participants, improve transparency, simplify filing, and assist plans to comply with applicable requirements. PBGC particularly strives to meet the needs of small businesses that sponsor defined benefit plans. In all such efforts, PBGC’s mission is to protect the retirement incomes of plan participants.
Open Government and Increased Public Participation

PBGC encourages public participation in the regulatory process. For example, PBGC’s "Federal Register Notices Open for Comment" webpage highlights when there are opportunities to comment on proposed rules, information collections, and other Federal Register notices. PBGC also encourages comments on an ongoing basis as it continues to look for ways to further improve the agency’s regulations. Efforts to reduce regulatory burden in the projects discussed above are in substantial part a response to public comments.
